Professional Summary

Computer Science (AI & ML) undergraduate building LLM-powered assistants, a custom AI-text detector deployed in production, and full-stack systems in Python and TypeScript. Salesforce Agentblazer Champion with two machine-learning research papers published/accepted; comfortable taking a problem from definition to working prototype and clear technical write-up.

Education

B.Tech, Computer Science & Engineering (AI & ML), Dayananda Sagar University, Bangalore 2024-2028
3rd Year · CGPA: 8.78

Skills

- **Programming:** Python (primary), TypeScript, C, Java, SQL, HTML, CSS
- **AI / ML:** Machine Learning, LLMs, RAG, Agentic AI, LLM Tool Calling, Transformers, XGBoost, Ensemble Learning, Vector Databases
- **Libraries / Frameworks:** PyTorch, Hugging Face Transformers, Scikit-learn, ONNX Runtime, NumPy, Pandas, FastAPI, SQLAlchemy, React, Next.js, Node.js/Express, Tailwind CSS, Vitest, pytest
- **Engineering & Databases:** REST APIs, DSA, OOP, System Design, Testing, Authentication, RBAC, RLS, Docker, PostgreSQL, MySQL, MongoDB

Work Experience

Web Developer Intern, Rizmak Solutions UAE, Abu Dhabi 06/2026 – Present

- Architected and shipped a production multi-tenant ERP across 7 business lines, implementing RLS, 4-tier RBAC, security auditing, signed URLs, and isolated test/production environments.
- Integrated an AI-powered assistant into RizmakBooks, a SaaS accounting platform serving Gulf-region businesses; led testing, debugging and QA for production deployments.
- Built **Scholarly**, an AI research copilot that checks uploaded papers for consistency, citation gaps and similarity, with an in-house AI-text detector (DistilRoBERTa + TF-IDF fusion, **0.98 ROC-AUC**) served via ONNX Runtime in place of a paid API.

Projects

- **Timetable AI, Department Scheduling Platform** (GitHub): FastAPI, PostgreSQL and Next.js app that imports 9 PDF timetables, blocks scheduling clashes, and answers availability questions through an LLM tool-calling assistant.
- **NLP Tutor, Textbook Q&A Assistant:** RAG tutor over a 646-page NLP textbook with hybrid search (vector + BM25, cross-encoder re-ranking, 0.93 Recall@5) and page-level citations (FastAPI, Qdrant, React).
- **AI-Based Islamic Knowledge Assistant:** RAG assistant over Qur'an, Hadith, Tafsir and scholarly sources (LLMs, Vector DBs).
- **FITRON, ML Framework:** modular Python framework for prediction and ranking (ML, fuzzy logic, TOPSIS).
- **KaamShaam, Task-Management Platform:** Next.js, TypeScript and Supabase app with PostgreSQL RLS, authentication, dashboard, calendar and progress tracking.

Publications

A Machine Learning based Predictive Framework for Rainfall Severity Classification and Flood Early Warning (Disaster Advances).

- Compared CatBoost, XGBoost and Random Forest on IMD data; CatBoost hit 87.5% accuracy (2025 Punjab flood).

Leakage-Aware Late Delivery Prediction in Supply Chain Logistics (ICETBCA 2026, Accepted).

- Leakage-aware stacking ensemble on 180K+ supply-chain records, reaching 0.8234 ROC-AUC.

Certifications

- **2026 Agentblazer Champion, Salesforce:** foundational knowledge of AI, data and agentic AI.
